

## Ericsson R&D Bangalore

### Job Description – Student Interns (Software Development)

#### Ericsson Overview:

Ericsson is world's leading provider of communications technology and services. Our offerings include services, consulting, software and infrastructure within Information and Communications Technology. We enable the full value of connectivity by creating game-changing technology and services that are easy to use, adopt and scale, making our customers successful in a fully connected world. We are truly a global company, operating across borders in over 180 countries, offering a diverse, performance-driven culture and an innovative and engaging environment.

**Research & Development (R&D)** is at the heart of our business with over **30,000** engineers, researchers and scientists around the world working on what's [next big thing with technology in focus](#). With more than **60,000** granted [patents](#), we have one of the strongest IPR portfolios in the industry.

As an Ericsson R&D Intern, you will have the freedom to think big and the support to turn ideas into achievements. Continuous learning and growth opportunities allow you to acquire the knowledge and skills necessary to progress and reach your career goals.

#### Exciting Opportunity:

Our R&D teams influence projects from conception to delivery, initiate ideas, articulate new developments, and present radical new thinking. It calls for people with the interest in, passion for and capability to develop, adapt and drive new technologies, ideas and concepts. We explore the avenues made available by our global reach, performing cutting-edge studies in cooperation with partners, customers, leading universities and research institutes in India and overseas.

Ericsson is now looking for **Student Interns** from **top-tier universities** in India, to significantly expand its **Research & Development** teams in **Bangalore**, working on various technologies such as: **Cloud Infrastructure, Cloud Native, 5G Core Networks, Network APIs, Cognitive Networks Design & Optimization and Packet Transport**.

#### Position

Student Intern, Reporting to a Manager at Ericsson R&D

Typical Tenure: **6 months or 12 months**

Location: **Bangalore**

#### Role Summary

As an **Intern**, you shall be a part of our growing team of Product Development Software Engineers. You shall **support** our software developers, network architects, analysts and data scientists on the ongoing projects.

### Key Responsibilities:

- Development, support, maintenance and implementation of small to medium non-complex components of a project module.
- Work on problems of limited scope, through usage of standard programming concepts and principles.
- Work under supervision/ guidance with frequent review of accomplished objectives. Participate on a project team of engineers involved in software development.
- Design, develop, enhance, maintain and document assigned modules of a product suite.
- Produce code within quality and coding standards following standard coding design processes and procedures/guidelines.
- Develop basic understanding of current product suite and provide ideas for improvement.
- Develop well-defined modules; and perform well-defined unit, product level and dev. tests.
- Carry out other related tasks and projects as required.
- Make routine technical decisions with clearly defined parameters but consult with other developers or Senior Engineers or Managers.
- Demonstrate self-organizational and planning skills.

### Key Qualifications:

- **B.E./B.Tech./M.E./M.Tech.** in **Computer Science** or **related** disciplines from any of the reputed institutes.
- **First Class with Distinction**
- Strong/solid grasp of software design/development and debugging skills of assigned modules of a comprehensive product suite.
- Theoretical and working knowledge of programming languages – **Java/C++/Python** [ For specific positions, there could be specific requirements, on a case basis.]
- Expected to develop domain knowledge along with technical / proprietary skills.
- Good grasp of software design/development and debugging skills of assigned modules.
- Good communication skills in written and spoken English
- Creativity and ability to formulate problems and solve them independently.
